

**AARGEE EQUIPMENTS PVT. LTD.,**

## Solar Inverter

Solar based inverter are efficient solution for present energy crises. Our Solar Inverter uses renewable Solar energy through Solar Panel and convert the same to AC Voltage to power the Equipments and Machines. We Employ highly Efficient charger to store the Solar Energy in battery and during power cut this is converted to AC voltage to give a continues Power. The Charger and the Inverter are Micro controller /DSP based design and they offer clean power to battery and load respectively. The system comes will all necessary protections.

### Features :

- ✓ Eco-Friendly.
- ✓ Easy to install.
- ✓ Pure and Clean Energy.
- ✓ Grid tie-up option available.
- ✓ All necessary Protections.
- ✓ Highly Efficient Charger and Inverter.
- ✓ Supports both linear and Non Linear load.
- ✓ Pre-settable Parameters.

## Solar Lantern

AARGEE's LED Based Solar Lantern uses Solar energy to charge the battery. The lantern's are capable of giving more than 8 hours backup. These Lantern's comes with 6 / 10 Watts Solar Panel depending on the wattage.

### Features :

- ✓ High Lumen LED's with low degradation.
- ✓ Highly efficient electronic circuit's for better efficiency.
- ✓ High efficient solar panel.
- ✓ Best quality battery is used.
- ✓ Virgin Plastic body with Acrylic Clear Covering.
- ✓ Interior and portable lighting.
- ✓ User friendly ABS body with handle.
- ✓ Portable design.
- ✓ High Light output.
